PROJECTS

Recipe Radar

Recipe Radar, a web-based recipe search application

- Designed and developed a web-based recipe search application using React.js and The Meal DB API
- Implemented features like recipe search, category/region filters, random suggestions, ingredient parsing, and a responsive UI with real-time data rendering

Random Password Generator

A web-based random password generator

- Developed a web-based random password generator using HTML, CSS, and JavaScript
- Ensured secure password generation with user-defined criteria and input validation
- Provided a responsive, user-friendly interface
